ELECTRICAL CAPABILITIES

WHO WE ARE

Jarlam Electrics Pty Ltd is an affiliate company to Jarlam Australia located in Bayswater Victoria, sharing offices and over 1000m² of workshop facilities. Jarlam Electrics was derived from a need within the industry to offer turnkey solutions for both Mechanical and Electrical installation and relocation services supporting the food, pharmaceutical and packaging industries.

Jarlam Electrics can assist with all electrical installations of new equipment, upgrades and relocations of existing equipment as well as all types of industrial electrical work.

HOW WE WORK

We pride ourselves on having the strongest commitment to our clients needs. Understanding our client and what is important to the project, is key to achieving desired results.

Lead times - Our clients lead times are crucial.

Consistent quality - Our quality assurance processes ensure that all services/projects are delivered with the highest standard of quality.

Turn key projects - Jarlam is able to successfully deliver turn key projects utilising our extensive project management experience as well as our multi discipline approach. Clients will have access to our supplier networks to ensure quality products at the best prices.

Client relations - Honesty, trust and communication has been at the forefront of developing long lasting relationships with our key clients.

“Jarlam has directly contributed to all the successful outcomes and achievements.”

AREAS OF EXPERTISE

Concentrating only on industrial electrical work, with an ongoing commitment to quality and service. Our electrical team's strength lies strongly in all aspects of industrial equipment installation as well as power upgrades to integrate new equipment to sites seamlessly.

Our services range from small electrical installations to full main switchboard upgrades and full re-wiring of plants.

Turnkey Installation and Relocations: We offer a range of services from engineering to electrical contracting to assist our clients in smooth installations and relocations on all types of manufacturing equipment.

Main Switchboard & Distribution Board Upgrades: Jarlam offer electrical design, manufacture and installation of main switchboards, distribution boards and mains cabling. Maintaining high standards required within the food and pharmaceutical and Packaging industries.

Automation Services: We offer a range of services from PLC & HMI programming, electrical design, control cabinet manufacturing and variable speed drive installations to ensure a reliable and efficient outcome.

General Electrical Contracting: We offer all electrical services from general power, servicing, as well as commissioning assistance.

TURNKEY PROJECTS & RELOCATIONS

Jarlam Electrics specialise in turnkey solutions for existing relocation or new project installations, which include the following:
