

# ELECTRICAL

## CAPABILITIES

**JARLAM**  
Electrics

Industrial electrical installations, upgrades and automation

“Great company to work with. Good quality build and design. Lots of technical experience in the electrical industry.”

## Areas of Expertise

Specialising in industrial electrical works, we manage everything from equipment installations and relocations to power upgrades, switchboard upgrades, and full plant re-wiring. Our core expertise includes:

- **Turnkey Installation & Relocations:** We provide complete engineering and electrical contracting support for the smooth installation and relocation of manufacturing equipment.
- **Main Switchboard & Distribution Board Upgrades:** We provide high-quality switchboard, distribution board and mains cabling solutions, designed and installed to specification.
- **Automation Services:** We deliver PLC & HMI programming, electrical design, control cabinet manufacturing and variable speed drive installations for reliable, efficient automation.
- **General Electrical Contracting:** We offer all electrical services from general power, servicing, as well as commissioning assistance.

# Turnkey Projects & Relocations

Jarlam Electrics specialise in providing turnkey solutions for new equipment installations and relocations projects.

Our services include:

- Electrical project management.
- Cable & data scheduling, code upgrades.
- Equipment installations & integrations.
- Electrical disconnections & reconnections.
- High quality hygienic electrical containment solutions.

**“Jarlam Electrics continually produced quality work and their employees conduct themselves in a professional manner.”**

## Main Switchboard Distribution Board & Mains Cabling Upgrades

Jarlam Electrics can provide the following services for electrical distribution upgrades:

- Main switchboard and distribution board, power factor correction electrical design, manufacture and installation.
- Electrical design including load and cable calculations.
- Mains & Submains cabling installation.

## Control Cabinets & Automation Solutions

We provide a diverse array of services across multiple platforms. Our specialties include:

- Electrical control cabinet design, manufacture & install.
- Motor control and variable speed drive solutions.
- Electrical schematics, PLC & HMI programming.
- Hygienic droppers and seamless automation solutions.
- Electrical safety upgrades to meet the required industry standard.

## Labour Hire & General Contracting

Our team at Jarlam Electrics are committed to delivering the best service and workmanship in the industry. Our industrial electricians are highly experienced and fully equipped to complement our service.

Our general electrical contracting work includes:

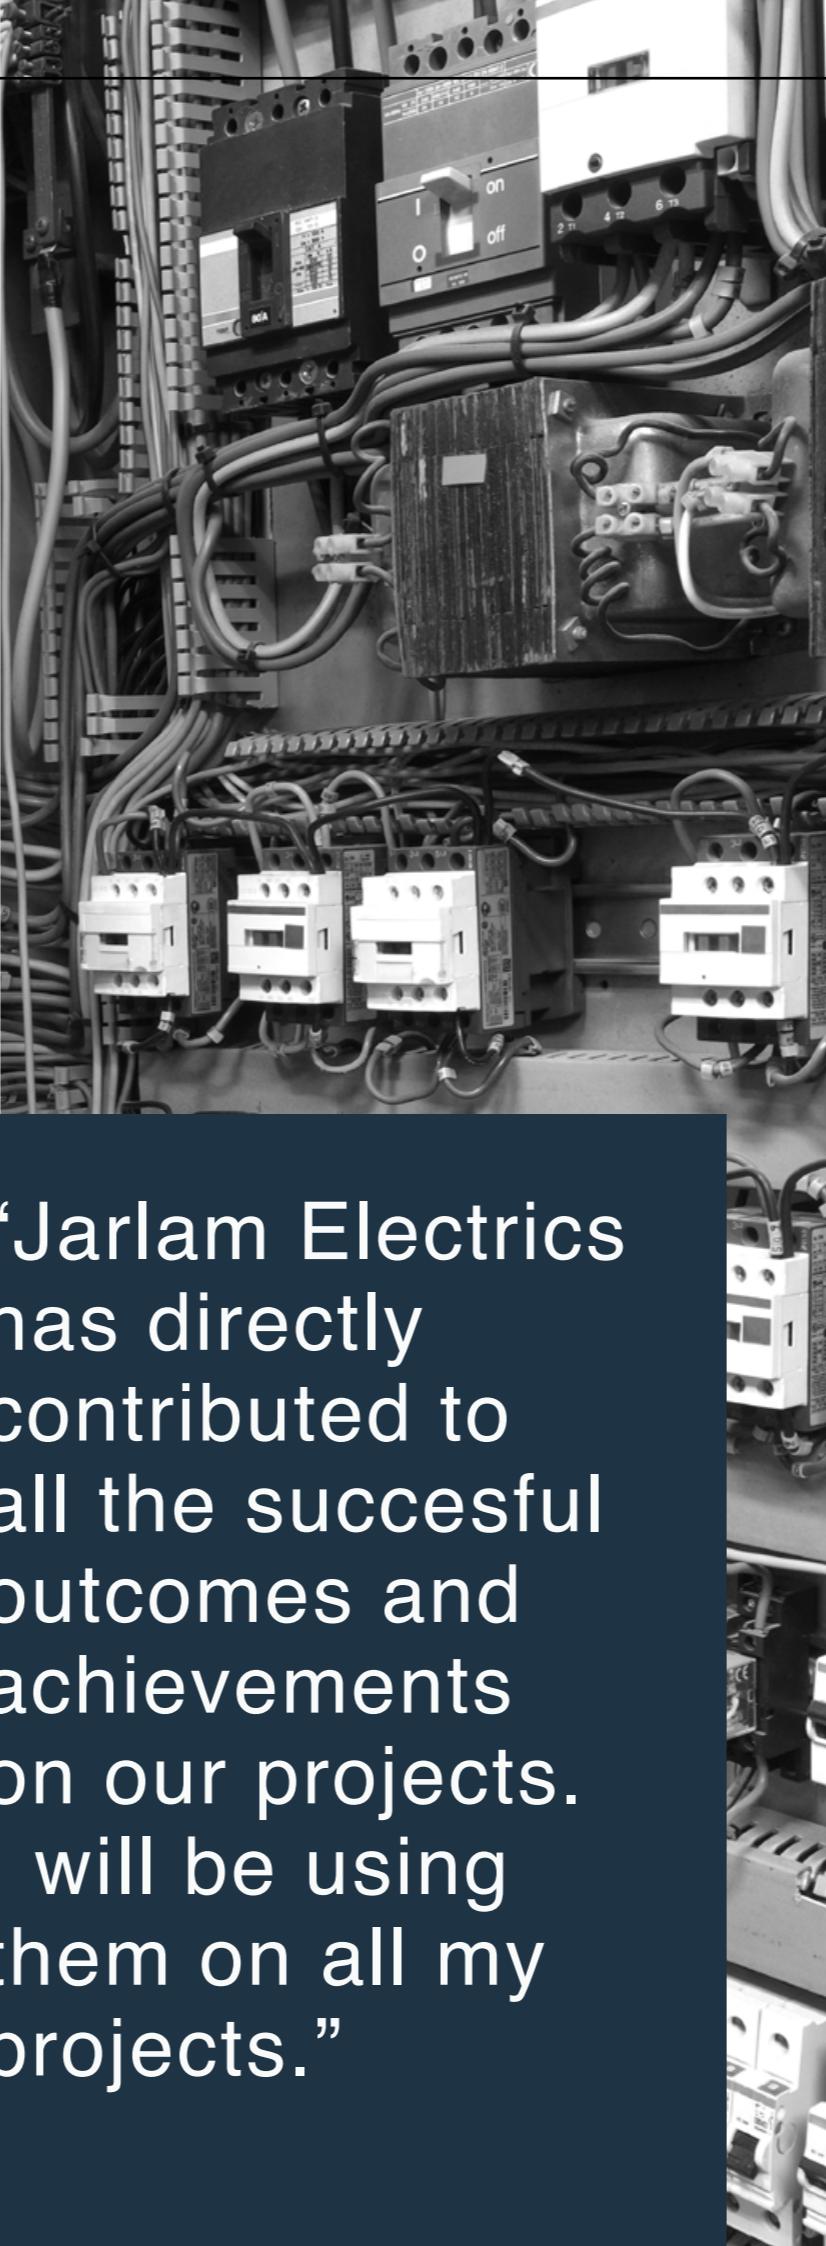

- Hazardous area engineering & electrical installations.
- General power, servicing and control cabling.
- Project commissioning & automation support.
- Electrical consulting and equipment purchase.
- Food grade electrical containment & cable installation.

**“The job was done on time and every member of the crew was attentive to safety requirements. I wouldn’t hesitate to recommend them.”**

# Our Values

At Jarlam Electrics we pride ourselves on providing high quality service by supplying skilled and experienced team members, who are not only great electricians, but fantastic people to work with. Our Values and Behaviours focus on:

- **Customer Service:** We are personable & professional and treat everyone with respect.
- **Reliability:** We finish projects on time & meet deadlines.
- **Pride:** We set high standards for completion of projects.
- **Teamwork:** We care about safety & collaborate to accomplish client and team goals.
- **Communication:** We are honest, trustworthy and communicate respectfully to develop long lasting relationships.

“Jarlam Electrics has directly contributed to all the successful outcomes and achievements on our projects. I will be using them on all my projects.”

# About Jarlam Electrics

Jarlam Electrics Pty Ltd is an affiliate company to Jarlam Australia, with both businesses located in Bayswater Victoria.

Originally formed to fulfill a need within the industry to provide a mechanical and electrical turnkey solution for customers, the business has now expanded to also include large and expansive electrical projects supporting the food, pharmaceutical, packaging and automated warehousing industries.

Jarlam Electrics can assist with all electrical services for new and relocated equipment installations including complete upgrades of existing equipment.
